

COURSE #WOODCSW2015

WOOD CASEWORK FOR THE LAB & SCIENCE ENVIRONMENT

[PROVIDER #401939

COURSE DESCRIPTION

Wood casework not only provides a warm and aesthetically pleasing environment, it provides durability and lifelong functions. This course will examine the use of wood casework in the lab and science environments. Including the SEFA testing standards and how they affect your environment.

KEY OBJECTIVES

- Obtain an appreciation for the effects of different wood veneers on the cost, appearance, and function of wood casework in the laboratory environment.
- Explore how specifications affect the end result of wood casework projects.
- Explore how specifications affect the end result of wood casework projects.
- Discuss the application of SEFA testing and standards to the lab and science environment and compare these tests across different casework materials.

Credit(s) earned on completion of this course will be reported to AIA CES for AIA members. Certificates of Completion for both AIA members and non-AIA members are available upon request. This course is registered with AIA CES for continuing professional education. As such, it does not include content that may be deemed or construed to be an approval or endorsement by the AIA of any material of construction or any method or manner of handling, using, distributing, or dealing in any material or product.
